

I COULD HAVE HAD A PROFESSIONAL SETTLEMENT PLANNER!?!

It happens every day. Attorneys work for months, sometimes years, to close a big case and when it's finally time to write up a settlement, they turn over the financial arrangements to a structured annuity broker with little or no settlement planning experience (and often little allegiance to the injured party). The result? A financial settlement that benefits the defendant and their insurance company more than the client — exposing plaintiff's counsel to possible malpractice liability. To think... a true settlement planning professional was available all along.

A settlement planning professional has the unique tools and training to limit attorney risk while ensuring the client receives an optimum financial outcome. A comprehensive settlement plan covers all the bases — not just a structured settlement annuity. We know because we are the recognized leader in the settlement planning industry. Settlement Professionals, Inc. has more Registered Settlement Planners and members of the Society of Settlement Planners than any other firm. Period. Discover how we can help your client... and you!
